This routing plan assigns each student to a prerequisite assessment starting point before any 5th grade re-teaching begins. Students are grouped by intervention tier based on scale score and domain profile. The prerequisite standards listed are the specific skills to assess first — not the skills to teach immediately, but the skills to assess to determine where instruction should begin. A student who cannot demonstrate mastery of the listed prerequisite should receive instruction at that level before any 5th grade standard is re-introduced.
